

The easy way to move a load ...

# Never Run out of LPG Again!

**INDICATORS  
PRICED  
TO SELL  
\$199.00  
INCLUDING GST**

**With an easy to install Low LPG Fuel Indicator, low levels of gas are detected and you are alerted by the dash indicator.**

dash indicator

The Low LPG Fuel Indicator is a new technology that senses when the cylinder has approximately 25% of LPG left in the cylinder. This gives the forklift operator 20-30 minutes advanced notice to complete the job and exchange cylinders in a safe area.

The indicator does not use pressure to detect fuel levels! Instead, it accurately detects change from a liquid to gas state.

What's inside the kit:

LISTED

Supply: 12vdc (10-14 v) 0.15A

Output: Max 1.5A

Temp: -250°C to +500°C

**Suits most makes and models!**
